

# High-precision Electro-magnetic Balances BL Series

BL3200HL

## Very quick response

Very fast response makes a great difference. Even repeated weighing work is comfortable and efficient.

## Compact body

The BL Series provides a high-precision electromagnetic system that is just as compact as a portable scale.

## High stability

The high stability mode of the BL Series produces steady readings even under poor environmental conditions.

## Various unit conversions

Percentage mode, and various unit conversions are standard. Switching between these functions and units is a simple key-touch.

## Analog bar display

Remaining weighing capacity can be seen at a glance. Especially helpful when filling containers on the balance.

## Square pan

Equipped with square pan for ease of operation.

## Interface Capabilities

Optional EP-80 / 90 printer can be connected directly to BL Series balances to produce reports. An optional interface is available to enable communication with a PC.

## Piece Counting Function

Quantity can be read as soon as parts are placed on the pan. To set, just load ten pieces and press the key. Pressing the key at 20, 50, or 100 pieces will produce even greater precision, especially for smaller parts. Switching between piece counting and gram display is a single key-touch.
